The Atlanta Public Schools, Accountability and Information Technology Division would like to invite a limited number of motivated high school seniors, college students and recent college graduates to participate in the 2017 Summer Technology Internship Program. The program allows interns a chance to gain insight and hands-on technology experience as they prepare to enter into the workforce.

During the 8-week program, interns will work with various teams to support different technology projects. The program will begin with a one-day orientation. On the days to follow, students will continue to receive technical skills and professional development training while working on live projects within supportive team environments. The internship also includes a helpful resume builder workshop as well as practice with public speaking and formal presentations.
