Hands-on research encourages students to apply their knowledge and skills to solve real-world problems, such as those faced by industry every day. More than 200 undergraduate and graduate students from all six College of Engineering & Computing departments will present projects and posters on their research in 18 cutting-edge interdisciplinary categories. As an industry and/or economic leader in Georgia, you will have the opportunity to interact with the student researchers and their faculty mentors during the showcase and learn how academic research in the College of Engineering & Computing can directly benefit your company or agency.

**Project Categories:**

- Biomedical
- Communications
- Cybersecurity
- Data Science
- Education
- Energy - Power & Storage
- Energy - Sustainable
- Environmental
- Fluids
- Healthcare
- Infrastructure
- Machine Learning/Algorithms
- Materials & Processes
- Robotics
- Smart Devices
- Vehicles - Autonomous
- Vehicles - ICE
- Vision/Sensors/GIS/UAVs
